Body	Sedan	Plant	Alliston, Ontario, Canada

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/honda/civic/2009

3 recalls listed by Transport Canada for this model year

Airbag

2018001 10 Jan 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator. For the GL1800 model, dealers will replace the airbag module. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.

Steering

2014345 11 Aug 2014

On certain vehicles, a fault in the Electric Power Steering (EPS) system could result in an immediate loss of power steering assist without warning to the driver. This would unexpectedly increase the steering effort force necessary to steer the vehicle at lower vehicle speeds, which could increase the risk of a crash causing injury and/or damage to property. Correction: Vehicles will receive a special extended warranty coverage of 10 years/240,000 km from first registration. Under this special coverage program, vehicles which experience this condition will have the electric power steering module replaced.

Other

2008384 21 Oct 2008

On certain vehicles, the bracket that covers the fuel hose connector is normally secured with a nut and bolt, however during assembly the nut was omitted. In the event of a crash, the bracket may become loose which could result in damage to the fuel hose connector. A damaged connector could lead to a fuel leak and increases the risk of fire causing property damages and personal injuries. Correction: Dealers will inspect affected vehicles and install a nut on the fuel feed hose bracket.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 5 live listings, as of 29 Nov 2026
[5] Live public dealer listings on Cardog, as of 29 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
