3 recalls listed by Transport Canada for this model year

Fuel system — 2021696 — 12 Nov 2021

Issue: On certain vehicles, the fuel pump could fail. If this happens, the engine may run rough or may not start and the check engine light may turn on. This could also result in a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power while driving could increase the risk of a crash. Corrective Actions: Mazda will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel pump.

Engine — 2019322 — 27 Jun 2019

Issue: On certain vehicles, a software error in the Powertrain Control Module (PCM) could cause the valve clearance adjuster not to work properly. This could result in internal engine damage. If this happens, the engine may misfire and lose power. In the worst case, the engine may stall while driving without the ability to restart it. The malfunction indicator light (MIL) may also turn on in the instrument cluster. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Mazda will notify owners by mail and instruct them to take their vehicle to a dealer to update the PCM software.

Airbag — 2018341 — 22 Jun 2018

On certain vehicles, the side curtain airbags may not unfold properly during deployment. This could increase the risk of injury to an occupant in the event of a side-impact or rollover crash. Correction: Dealers will replace the side curtain airbags.
