1 recall listed by Transport Canada for this model year

Other 2013114 10 Apr 2013

On certain vehicles, the brake-shift interlock may not function properly at low temperatures. This could allow the transmission gear shift lever to be moved out of the PARK position without depressing the brake pedal. Depending which gear the driver selects, the vehicle could begin to move forward or backward immediately. This movement could result in property damage, or cause the vehicle to strike a bystander, potentially resulting in personal injury. Correction: Dealers will replace the gear shift assembly stopper.
