Issue: On certain vehicles, the bracket that secures the rear center seat belt buckle may not have been manufactured properly. As a result, the seat belt could detach in a crash. Safety Risk: A seat belt that detaches in a crash could increase the risk of injury. Corrective Actions: To reduce the safety risk, Hyundai advises that you shouldn't transport a passenger in the rear center seat until the recall repairs are completed. Hyundai will notify owners in writing and advise you to take your vehicle to a dealership to replace the rear center seat belt buckle.

Issue: On certain vehicles, the front steering knuckle(s) may not have been manufactured properly. As a result, the knuckle(s) could crack and/or break and cause a loss of steering control. Safety Risk: A loss of steering control could create the risk of a crash. Corrective Actions: Hyundai will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the steering knuckle(s).

Visual system

2026033 27 Jan 2026

Issue: On certain vehicles, a software problem could cause the instrument panel cluster to reboot while driving. As a result, you may not be able to see certain information about the vehicle, including the speedometer, fuel gauge, tire pressure monitoring system (TPMS), warning lights and malfunction tell-tales. Note : For the Santa Fe model, this recall only affects the hybrid model. For the Palisade model, both gas and hybrid models are affected. For the Tucson model, gas, hybrid and plug-in hybrid (PHEV) models are affected. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: Hyundai will notify owners in writing and send a wireless over-the-air software update to eligible vehicles to update the instrument panel cluster software. Alternatively, you may schedule an appointment to have the update performed at a Hyundai dealership.
