3 recalls listed by Transport Canada for this model year

Steering

2017193 4 Apr 2017

On certain vehicles, a connection at the electric power steering (EPS) motor may have been damaged at time of assembly. This could lead to a loss of the steering assist. A loss of power steering assist could unexpectedly increase steering effort which would increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the EPS motor.

Brakes

2017055 7 Feb 2017

On certain vehicles, the diaphragm in brake booster may unseat due to a manufacturing defect. This could result in a vacuum leak in the brake system and a reduction or loss in power brake assist, which would increase pedal effort, and extend stopping distances, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the vehicle brake system's booster assembly.

Airbag

2016174 21 Apr 2016

On certain vehicles, a manufacturing error could cause the second stage of the driver's frontal airbag to fail to deploy. This would increase the risk of injury to the driver in a crash severe enough to warrant the deployment of the airbag`s second stage. Correction: Dealers will replace the driver's frontal airbag module.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
