§2 OBLIGATIONS [2]

cardog.app/tools/recalls/jeep/grand-cherokee/2023

17 recalls listed by Transport Canada for this model year

Suspension

2026418 1 Sep 2026

Issue: On certain vehicles, the recall repairs completed by an FCA dealer during recalls 64A and 20D (Transport Canada recall nos. 2023-336 and 2026-037) may not have been done correctly or may not be effective. As a result, another repair is required. On certain vehicles, the rear coil springs may not have been installed correctly. As a result, the spring(s) could detach from the vehicle while driving. Note: This recall affects 2022-2023 Jeep Grand Cherokee and 2021-2023 Grand Cherokee L models. Safety Risk: A coil spring that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to replace the rear coil spring lower isolators.

Airbag

2026244 21 May 2026

Issue: On certain vehicles, a software problem in the occupant restraint controller could cause the door airbag pressure sensor(s) not to work properly. As a result, the side airbag(s) may not work properly in a crash. Note: This recall affects 2022-2025 Grand Cherokee and 2023-2025 Grand Cherokee L models. Safety Risk: Airbags that don't work properly could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to update the occupant restraint controller software.

Suspension
2026037 29 Jan 2026

Issue: On certain vehicles, the recall repairs completed by an FCA dealer during recall 64A (Transport Canada recall no. 2023-336) may not have been done correctly. As a result, a second repair is required. On certain vehicles, the rear coil springs may not have been installed correctly. As a result, the spring(s) could detach from the vehicle while driving. Note: This recall affects 2022-2023 Jeep Grand Cherokee and 2021-2023 Grand Cherokee L models. Safety Risk: A coil spring that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, repair the rear coil spring assemblies.

Engine
2025617 6 Nov 2025

Issue: On certain vehicles, the engine may not have been manufactured properly. As a result, the engine could make abnormal noises and a warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This recall only affects plug-in hybrid (PHEV) models. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and/or increase the risk of a vehicle fire. Both issues could increase the risk of a crash or injury. Corrective actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to update the powertrain control module software. This software will monitor the engine and warn you if it detects a problem. If you see this warning, you should contact a dealership to arrange for the replacement of the engine.

High voltage
2025595 30 Oct 2025

Issue: On certain vehicles, the recall repairs completed by an FCA dealer during recall 95B (Transport Canada recall no. 2024-566) may not be effective. As a result, another repair is required. On certain vehicles, there could be a problem inside the high-voltage battery that can cause a fire, even while parked with the ignition off. Note: This recall only affects 4xe plug-in hybrid (PHEV) models. This recall replaces Transport Canada recall no. 2024-566. Safety Risk: The vehicle could catch fire, even while parked and turned off. Corrective Actions: To reduce the safety risk, FCA advises not to charge your vehicle, and to park it outdoors and away from other vehicles or structures until the recall repairs have been completed. FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to update the high-voltage battery pack software. If necessary, the battery pack will be replaced.

High voltage
2025453 4 Sep 2025

Issue: On certain vehicles, a software problem in the hybrid control processor could cause a loss of power to the wheels. Note: This recall only affects plug-in hybrid (PHEV) models. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing. The corrective actions for this recall are under development.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same configuration, 21 live listings, as of 5 Nov 2026

[5] Live public dealer listings on Cardog, as of 6 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
