3 recalls listed by Transport Canada for this model year

Engine

2024146 4 Mar 2024

Issue: On certain vehicles, the left turbocharger oil feed pipe and hose assembly could become damaged by heat from the exhaust. If this happens, oil could leak onto hot components. Note: This recall only affects vehicles equipped with a 3.3 L turbo (T-GDI) engine. Safety Risk: Oil that leaks onto hot components can create the risk of a fire. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to replace the left turbocharger oil feed pipe and hose assembly.

Brakes

2020404 31 Aug 2020

Issue: On certain cars equipped with a 3.3 L T-GDI engine, an engine compartment fire could occur while driving. Kia believes that a fire could start in or near the brake Hydraulic Electronic Control Unit (HECU). Note: This recall does not affect vehicles equipped with Smart Cruise Control (SCC). Safety Risk: The car could catch fire while driving. Corrective Actions: Kia will notify owners by mail and instruct you to take your vehicle to a dealer to install a new fuse kit. The kit contains two new fuses of 25A instead of 40A, which are designed to prevent an over-current condition.

Electrical

2018598 30 Oct 2018

On certain vehicles, the front wiring harness could come in contact with a sharp metal opening on the left inner fender and become damaged. This could result in an electrical short-circuit and create the risk of a fire causing injury and/or damage to property. Correction: Dealers will inspect the front wiring harness for damage. If no damage is found, the dealer will install a plug/cover to the opening on the left inner fender. If damage is found, the front wiring harness will be replaced and a plug/cover will be installed to cover the opening on the left inner fender.
