1 recall listed by Transport Canada for this model year

### Airbag

2025021 17 Jan 2025

Issue: On certain vehicles, the wiring under the front passenger seat may not have been routed correctly. As a result, the wiring could become damaged when the seat is moved. If this happens, the airbags and seat belt pretensioners may not work and/or the airbag system may not turn off the passenger-front airbag when an infant or child seat is in the front passenger seat. This problem could also cause the passenger side seat airbag to inflate unexpectedly. Note: This recall only affects vehicles equipped with a manual front passenger seat. This recall also affects Niro hybrid and plug-in hybrid (PHEV) models. Safety Risk: Airbags and/or seat belt pretensioners that don't work properly could increase the risk of injury in a crash. Additionally, an airbag that deploys without a crash could create a risk of injury. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the wiring under the front passenger seat. The dealer will also reroute and install covers to protect the wiring.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
