5 recalls listed by Transport Canada for this model year

Engine — 2017184 — 29 Mar 2017

On certain vehicles equipped with 1.6L GTDI engines, low coolant level could lead to localized overheating of the cylinder head, which could cause a fire. This could increase the risk of injury and/or damage to property. Correction: Dealers will install a coolant level sensor and supporting hardware and software. Note: Until repair parts are available, owners should regularly check engine coolant level and top up as necessary. Also note for Fiesta, only the ST model vehicles are affected.

Structure — 2017183 — 29 Mar 2017

On certain vehicles, the door latches may have a broken pawl spring tab. This could result in the door not latching correctly. As a result, doors which appear to be latched could unlatch while driving. This could increase the risk of injury to a vehicle occupant seated next to the door, or result in damage to property. Correction: Dealers will replace all four door latches with a more robust part. Note: This is an expansion of recall 2015-175.

Fuel system — 2015176 — 28 Apr 2015

On certain vehicles, improper nickel plating of certain fuel pump internal components could contaminate the pump, potentially resulting in an inoperative fuel pump. This could result in a no-start condition, or an engine stall without warning and without the ability to restart the vehicle, which could increase the risk of a crash. Correction: Dealers will replace the Fuel Delivery Module (FDM).

Structure — 2015175 — 24 Apr 2015

On certain vehicles, the door latches may have a broken pawl spring tab. This could result in the door not latching correctly. As a result, doors which appear to be latched could unlatch while driving. This could increase the risk of injury to a vehicle occupant seated next to the door, or result in damage to property. Correction: Dealers will replace all four door latches with a more robust part.

Fuel system

2014282 3 Jul 2014

On certain vehicles, the fuel tank may have been manufactured incorrectly and could allow fuel to leak from the tank pinch seam. Fuel leakage, in the presence of an ignition source, could result in a fire causing injury and/or property damage. Correction: Dealers will replace affected fuel tanks.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 10 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
