2 recalls listed by Transport Canada for this model year

Engine

2025083 18 Feb 2025

Issue: On certain vehicles, the piston oil rings may not have been manufactured properly and could damage the cylinder walls. As a result, the engine could make abnormal noises, and a warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This recall only affects certain vehicles equipped with a 2.0L MPI engine. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and/or increase the risk of a vehicle fire. Both issues could increase the risk of a crash or injury. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine. The dealer will also install a software that will monitor the engine and warn you if it detects a problem. If you see this warning, you should contact a dealership to arrange replacement of the engine.

Label

2024549 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Kia has corrected the compliance label for all new vehicles.
