2 recalls listed by Transport Canada for this model year

Structure

2026410 25 Aug 2026

Issue: On one vehicle, the battery tray bracket may not have been attached properly. As a result, it could move in a crash and reduce crash performance. Safety Risk: Reduced crash performance could increase the risk of injury. Corrective Actions: Ford will notify the owner by mail and advise them to take their vehicle to a dealership to inspect and secure the battery tray bracket, as necessary.

Powertrain

2025691 12 Dec 2025

Issue: On certain vehicles, a problem in the integrated park module could cause the park pawl not to engage when the transmission is shifted to the park (P) position. If this happens, the vehicle could move when it's parked, and the parking brake isn't used. Note: This problem would cause a wrench light and a shift system fault message to be displayed in the instrument cluster. For the Maverick, Escape and Corsair models, this recall only affects vehicles equipped with a 2.5 L hybrid engine. For the F-150 model, this recall only affects Lightning (electric) models. Safety Risk: A parked vehicle that rolls away could create the risk of an injury or a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the secondary on board diagnostic module (SOBDMC) software.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
