Steering

2018180 12 Apr 2018

On certain vehicles originally sold, or currently registered in areas of heavy road salt usage during winter months (Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland & Labrador), the bolts that attach the power steering gear assist motor to the gear housing may corrode and fracture. This could allow the power steering gear assist motor to move, causing the belt to slip which could result in a loss of power steering assist. A loss of power steering assist would require additional steering effort which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the aluminum mounting bolts with coated steel bolts and will apply a corrosion-preventative sealer around the gear housing and connecting bolts. If a bolt is found to be broken or breaks during the course of the repair, a replacement steering gear will be installed.

Lights and instruments

2016200 5 May 2016

Certain vehicles may not comply with the requirements of Canada Motor Vehicle Safety Standard 108 - Lighting System and Retroreflective Devices. The rear license plate lamp housing may fall out and fail to illuminate the license plate properly as required by the standard. Correction: Dealers will replace both rear license plate lamp housings with an updated version.
