3 recalls listed by Transport Canada for this model year

Airbag

2026292 12 Jun 2026

Issue: On certain vehicles, the connector for the driver-front airbag in the steering wheel could corrode. As a result, the driver-front airbag may not inflate in a crash. Note: This problem would cause the airbag warning light to turn on. Safety Risk: An airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to apply grease to the driver's airbag connector terminals.

Fuel system

2026206 23 Apr 2026

Issue: On a small number of vehicles, the fuel tank may not have been manufactured properly. As a result, the wall of the fuel tank may be too thin and could leak fuel in a crash. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel tank.

Seats and restraints

2026126 18 Mar 2026

Issue: On certain vehicles, the brackets that secure the third-row seat belt anchors may not have been manufactured properly. As a result, the seat belt(s) could detach in a crash. Safety Risk: A seat belt that detaches in a crash could increase the risk of injury. Corrective Actions: To reduce the safety risk, Land Rover recommends that you shouldn't transport passengers in the third-row seats until the recall repairs are completed. Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to install bolt(s) to secure the third-row seat belt anchor brackets or, if necessary, replace the anchor brackets.
