Body	Sport Utility Vehicle	Plant	Solihull, England

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/land-rover/range-rover/2017

4 recalls listed by Transport Canada for this model year

Suspension

2025338 19 Jun 2025

Issue: On certain vehicles, the front suspension knuckles could crack and/or break. A front knuckle that breaks while driving could cause a sudden loss of vehicle control. Note: This recall is an expansion of N759 (Transport Canada recall no. 2022-668). Certain vehicles that were inspected/repaired under that recall, also require this repair. Safety Risk: A loss of vehicle control could increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to inspect the front suspension knuckles. If the knuckles aren't cracked, the dealer will install retaining brackets. If cracks are found, the dealer will replace the knuckle(s).

Engine

2018274 23 May 2018

On certain vehicles equipped with a diesel engine, a software issue could cause the fuel gauge to display a low fuel level and turn on the low fuel light, even though the fuel tank is not nearing empty. This could cause the engine management system to wrongly shut off the engine to protect it from what it interprets as a low fuel condition. This would result in a loss of vehicle propulsion and a loss of power braking assist, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will update the vehicle software.

Lights and instruments

2017525 26 Oct 2017

On certain vehicles, the instrument cluster could go blank intermittently and be unable to display important information. This could result in the driver not being aware of vehicle speed or any malfunction lights turning on, which could affect vehicle performance and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update the vehicle software.

Seats and restraints

2016653 22 Dec 2016

Certain vehicles may have been equipped with front seat belt pretensioners that do not meet specifications. This could cause the pretensioners to fail to deploy in the event of a crash, which could increase the risk of injury to the front seat occupants. Correction: Dealers will check the production date of the front seat belt assemblies (which incorporate the pretensioners) and replace as necessary.

> Listed for the model year, not checked against your VIN. Land Rover confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 7 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
