2 recalls listed by Transport Canada for this model year

Powertrain

2020369 12 Aug 2020

Issue: On certain vehicles, the left-front axle shaft may not have been heat treated, and could break. If this happens, there would be a loss of power to the wheels. Also, if this happens and the vehicle is parked without the parking brake applied, the vehicle could roll away. Safety Risk: A loss of power to the wheels or a vehicle rollaway could increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the left front axle shaft for a heat treatment code. If the heat treatment code is missing, the driveshaft will be replaced.

Lights and instruments

2018610 2 Nov 2018

Certain vehicles may fail to comply with the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 108 - Lighting System and Retroreflective Devices. The LED headlamps may have been produced with improper low-beam lamp aiming, which is contrary to the requirements of the standard. This could reduce illumination of the roadway, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect the headlamps and replace them as necessary.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
