4 recalls listed by Transport Canada for this model year

Label

2026278 9 Jun 2026

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE / NON-APPLICABLE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. Bentley has corrected the tire and loading information label for all new vehicles.

Fuel system

2023470 23 Aug 2023

Issue: Under certain conditions, the fuel supply module connectors and wiring could overheat. If this happens, the fuel supply module could melt and create a fuel leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Bentley will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel supply module flange and wiring.

Fuel system

2020245 2 Jun 2020

Issue: On certain vehicles, the quick connector for the fuel line in the engine compartment can soften due to exposure to high engine temperatures. If this happens, there could be a fuel odour or fuel leak in the engine compartment. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Bentley will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel line and quick connector.

Seats and restraints

2020124 23 Mar 2020

Issue: On certain vehicles, the bolts used to attach the third row seat belts may not be long enough. As a result, the seat belts could detach from the rear pillar in a crash. Safety Risk: A seat belt that detaches in a crash could create an increased risk of injury. Corrective Actions: Bentley will notify owners by mail and instruct you to take your vehicle to a dealer to replace the bolts that attach the third-row seat belts to the rear pillars.
