2 recalls listed by Transport Canada for this model year

Powertrain

2015366 12 Aug 2015

On certain vehicles, the driver's foot could contact the edge of the center console lower trim panel, which could impede smooth accelerator pedal operation. The panel edge could also catch the driver's shoe, potentially resulting in a delay in the driver being able to shift their foot from the accelerator to the brake pedal. This could increase stopping distances, potentially resulting in a crash causing injury and/or damage to property. Correction: Dealers will modify the lower trim panel.

Structure

2015334 23 Jul 2015

Certain vehicles fail to conform to Canada Motor Vehicle Safety Standard 206 – Door Lock and Door Retention Components. A manufacturing error could cause the left front and/or left rear door latches to fail to fully latch and fail to meet the requirements of the standard. As a result, occupants may be at greater risk of injury in a crash, and unbelted occupants could fall from the vehicle and sustain injury. Correction: Dealers will inspect latches and replace as necessary.
