§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/versa/2014

2 recalls listed by Transport Canada for this model year

Powertrain

2015366 12 Aug 2015

On certain vehicles, the driver's foot could contact the edge of the center console lower trim panel, which could impede smooth accelerator pedal operation. The panel edge could also catch the driver's shoe, potentially resulting in a delay in the driver being able to shift their foot from the accelerator to the brake pedal. This could increase stopping distances, potentially resulting in a crash causing injury and/or damage to property. Correction: Dealers will modify the lower trim panel.

Electrical

2015282 25 Jun 2015

On certain vehicles, due to a manufacturing defect the start/stop button could stick inside of its housing. If this occurs, vibration could cause the electrical components inside the button to contact repeatedly in quick succession and initiate the emergency engine shut off procedure while the vehicle is in motion. This could result in increased steering and braking effort, a loss of motive power and would disable the supplemental restraint systems (SRS), increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will inspect and repair defective start/stop switch as necessary.

> Listed for the model year, not checked against your VIN. Nissan confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
