3 recalls listed by Transport Canada for this model year

Electrical

2021740 9 Dec 2021

Issue: On certain vehicles, if you spill liquid on the rear seat, or drive through heavy rain or deep water, the gateway control module could be damaged. If this happens, the vehicle may enter emergency mode and suddenly lose power to the wheels. Note: The power steering and braking systems will continue to work. You may also see warning messages on the instrument panel when this happens. Safety Risk: A sudden loss of power to the wheels may increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealer to install a protective cover on the gateway control module and seal an underbody seam, as necessary.

Suspension

2021249 26 Apr 2021

Issue: On certain vehicles, the lock nuts for the rear trailing arm bolts may be defective. If a nut breaks, there could be sudden changes in rear wheel alignment. This can cause a loss of vehicle stability. Safety Risk: Reduced vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealer to replace the rear trailing arm lock nuts. If necessary, the associated bolt(s) will be replaced as well.

Seats and restraints

2020392 26 Aug 2020

Issue: On certain vehicles, parts of the front seat frame and backrest adjuster may not have been properly welded. As a result, the backrest adjustment could break in a rear-end crash and allow to seat to move. Safety Risk: A seatback that fails could cause an increased risk of injury in a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the driver and passenger front seats. The seatback frames will be replaced, as necessary.
