**2** recalls listed by Transport Canada for this model year

### Engine

2025356 27 Jun 2025

Issue: On certain vehicles, the engine may not have been manufactured properly. As a result, the engine could make abnormal noises and a warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This recall only affects certain vehicles equipped with 1.5 L or 2.0 L variable compression engines. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and/or increase the risk of a vehicle fire. Both issues could increase the risk of a crash or injury. Corrective actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine. On certain vehicles, the dealer will also update the engine control module.

### Structure

2023157 21 Mar 2023

Issue: On certain vehicles, the wrong door latch may have been installed in the front passenger door. As a result, the automatic locking function won't work on that door. An unlocked door could open in a crash. Safety Risk: A door that opens in a crash could increase the risk of injury. Corrective Actions: Infiniti will notify owners by mail and instruct you to take your vehicle to a dealership to replace the right-front door lock assembly.
