cardog.app/tools/recalls/infiniti/qx50/2021

3 recalls listed by Transport Canada for this model year

Engine

2025356 27 Jun 2025

Issue: On certain vehicles, the engine may not have been manufactured properly. As a result, the engine could make abnormal noises and a warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This recall only affects certain vehicles equipped with 1.5 L or 2.0 L variable compression engines. Safety Risk: An engine failure could cause a sudden loss of power to the wheels and/or increase the risk of a vehicle fire. Both issues could increase the risk of a crash or injury. Corrective actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the engine. On certain vehicles, the dealer will also update the engine control module.

Suspension

2021350 28 May 2021

Issue: On certain vehicles, the rear axle housings may not have been properly heat-treated. As a result, a strong impact (such as hitting a curb) could cause a rear axle housing to bend or break. If this happens, a wheel could be mis-aligned or there could be a loss of control and a wheel could separate. Safety Risk: A loss of control and/or a wheel separation could increase the risk of a crash. A wheel that separates could also hit another person or vehicle. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the production date on the casting stamp of the rear axle housings. Parts that are affected by this problem will be replaced.

Steering

2021334 28 May 2021

Issue: On certain vehicles, the front steering knuckles may not have been properly heat-treated. As a result, a strong impact (such as hitting a curb) could cause a steering knuckle to bend or break. If this happens, the steering wheel may become off-center or there could be a loss of steering control and a wheel could separate. Safety Risk: A loss of steering control and/or a wheel separation could increase the risk of a crash. A wheel that separates could also hit another person or vehicle. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the production date on the casting stamp of the front steering knuckles. Parts that are affected by this problem will be replaced.

> Listed for the model year, not checked against your VIN. Infiniti confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 17 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
