3 recalls listed by Transport Canada for this model year

Structure — 2026392 — 13 Aug 2026

Issue: On certain vehicles, the recall repairs completed by an FCA dealer during recalls Y73 and 20A (Transport Canada recall nos. 2021-663 and 2023-090) may not be effective. As a result, another repair is required. On certain vehicles, the rear spoiler could hit the body when opening and closing the liftgate. This could damage the spoiler and cause it to detach from the vehicle. Safety Risk: A spoiler that detaches from the vehicle could create a road hazard for others. Corrective Actions: FCA Canada will notify owners in writing. The corrective actions for this recall are under development.

Label — 2024548 — 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Structure — 2023090 — 23 Feb 2023

Issue: On certain vehicles, the rear spoiler could hit the body when opening and closing the liftgate. This could damage the spoiler and cause it to detach from the vehicle. Note: This is an expansion of Transport Canada Recall 2021-663. Safety Risk: A spoiler that detaches from the vehicle could create a road hazard for others. Corrective Actions: FCA Canada will notify owners by mail and instruct you to take your vehicle to a dealership to inspect and, if necessary, replace the rear spoiler.
