cardog.app/tools/recalls/lucid/air/2024

9 recalls listed by Transport Canada for this model year

Lights and instruments

2026404 20 Aug 2026

Issue: On certain vehicles, the circuits for the exterior lighting may not have proper circuit protection. As a result, the wiring and components could overheat and melt, and the exterior lights may not work. Safety Risk: Wiring and/or components that overheat and melt can create the risk of a fire. Exterior lights that don't work could increase the risk of a crash. Corrective Actions: To reduce the safety risk, Lucid advises that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed. Lucid will notify owners by mail. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.10.0 or a later release.

Powertrain

2026230 13 May 2026

Issue: On certain vehicles, the inverter for the drive unit could fail and cause a loss of power to the wheels. Note: This recall only affects certain Air Pure rear-wheel drive models. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Lucid will notify owners by mail and send a wireless over-the-air software update to each vehicle to install an advanced diagnostic software that will monitor the inverter and warn you if it detects a problem. If you see this warning, you should contact a Lucid Service Center or Lucid Customer Care to arrange for the replacement of the inverter, as necessary.

Powertrain

2026143 26 Mar 2026

Issue: On certain vehicles, the bolts securing the axle shafts to the drive unit may not have been tightened properly. As a result, the axle shaft(s) could separate from the drive unit and cause a sudden loss of power to the wheels. Note: This recall is an expansion of Transport Canada recall no. 2025-535. This recall only affects certain Air Pure rear-wheel drive models. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Lucid will notify owners by mail and advise you to contact a Lucid Service Center or Lucid Customer Care to schedule an appointment to replace the axle shaft bolts.

Visual system

2026012 16 Jan 2026

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Note: This problem would cause a "Camera Error. Turn your vehicle off and on again" message to be displayed. This recall only affects vehicles equipped with the optional DreamDrive Pro package. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Lucid will notify owners by mail. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.8.17 or a later release.

Visual system

2025536 7 Oct 2025

Issue: On a small number of vehicles, a software problem could cause the rearview camera image to be delayed or not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Lucid will notify owners by email. Lucid has sent a wireless over-the-air software update to each vehicle. If you haven't yet accepted the software update, Lucid encourages you to do so. If you need assistance with this update, you should contact Lucid customer care or a Lucid service center. There is no further action needed if your vehicle has software version 2.8.0 or a later release.

Powertrain

2025535 7 Oct 2025

Issue: On a small number of vehicles, the bolts securing the axle shafts to the drive unit may not have been tightened properly. As a result, the axle shaft(s) could separate from the drive unit and cause a sudden loss of power to the wheels. Note: This recall only affects certain Air Pure rear-wheel drive models. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Lucid will notify owners by email and advise you to contact a Lucid Service Center or Lucid Customer Care to schedule an appointment to inspect and, if necessary, replace the axle shaft bolts.

3 more on the model-year record, cardog.app/tools/recalls/lucid/air/2024

Window sticker — We do not collect window stickers for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 3 live listings, as of 27 Oct 2026
[5] Live public dealer listings on Cardog, as of 27 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
