Body	Sedan	Plant	Germany

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/mercedes-benz/s-class/2018

9 recalls listed by Transport Canada for this model year

Powertrain

2026168 2 Apr 2026

Issue: On certain vehicles, the driveshaft may not have been manufactured properly. Over time, the driveshaft could wear and the universal joint could break. If this happens, there could be a loss of power to the wheels. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the driveshaft.

Accessories

2021041 1 Feb 2021

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the central display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and instruct you to take your vehicle to a dealer to update the head unit software.

Engine

2020121 22 Mar 2020

Issue: On certain S 560 and Maybach S 560 models, the plugs used to close oil ports on the engine could fail. If this happens, oil can leak from the engine. If the engine oil level drops, a red warning message would display in the instrument cluster. If a driver continues to operate the vehicle, the engine could run out of oil and fail. Safety Risk: An oil leak on the road surface could become a hazard for other road users. An engine that fails would result in a sudden loss of engine power. Both of these conditions could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and instruct you to take your vehicle to a dealer to replace the closure plugs. You should avoid sudden acceleration and driving the vehicle at high engine speeds until the recall repairs are completed. If you detect any of the warnings listed, you should contact a dealership to have your vehicle inspected.

Engine
2020026 24 Jan 2020

Issue: On certain vehicles equipped with a 4.0 liter 8-cylinder gas engine, the oil feed line to the turbochargers could leak. As a result, oil could leak onto hot components in engine compartment. Safety Risk: Oil leaking onto a hot engine components could cause a fire. Corrective Actions: Mercedes-Benz will notify owners by mail and instruct you to take your vehicle to a dealer to replace the oil feed line to the turbochargers.

Engine
2019584 18 Nov 2019

Issue: On certain S560 4Matic models, a bolt for an engine timing chain wheel could come loose. If this happens, the timing chain may skip and cause severe engine damage. As a result, the engine could stall or fail. Safety Risk: A loss of engine power could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and instruct you to take your vehicle to a dealer to replace the engine.

Steering
2018729 20 Dec 2018

On certain S-Class, AMG S 63 and Maybach S 560 models, the steering boot may not be positioned correctly. When the steering assistant is active, this could cause the Hands-off Detection feature not to detect when the driver removes their hands from the steering wheel. This may create a situation where dash warnings prompting the driver to grasp the steering wheel are not displayed as well as a failure to initiate a system function which brings the vehicle to a complete stop. This could create an increased risk of a crash causing injury and/or damage to property. Correction: Dealers will check the position of the steering boot and correct it, if necessary.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] Cardog market quote, same model year, 5 live listings, as of 29 Oct 2026
[4] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
