4 recalls listed by Transport Canada for this model year

Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Seats and restraints

2019276 7 Jun 2019

Issue: A problem with the driver's seat belt could cause it not to lock-up as designed during braking or in a crash. Safety Risk: A seat belt that does not lock properly in a crash could cause an increased risk of injury. Corrective Actions: The company will notify owners by mail and instruct them to take their vehicle to a dealer to replace the driver's seat belt assembly.

Lights and instruments

2017189 31 Mar 2017

Certain vehicles may fail to comply with the requirements of CMVSS 108 - Lighting System and Retroreflective Devices. The bumper embedded rear inner brake lights turn off when the turn signal light is applied, contrary to requirements of the standard. This could be confusing to a road user located behind the vehicle during simultaneous braking and signalling, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will reprogram the vehicle to correct the non-compliance.

Airbag

2016369 21 Jul 2016

On certain vehicles, the fabric cover of the side curtain airbags may not have been pre-perforated correctly. This could prevent the airbag from deploying as intended. A side curtain airbag that does not deploy as intended during a crash (where side curtain airbag deployment is warranted) could increase the risk of injury to vehicle occupants. Correction: Dealers will rework the fabric covers of the side curtain airbags.
