1 recall listed by Transport Canada for this model year

**Engine** 2015091 27 Feb 2015

On certain vehicles, during assembly, some of the connecting rod bolts may not have been torqued to the correct specification. If a connecting rod bolt was not torqued correctly, it could loosen and result in the engine making an unusual rattling/knocking noise, leaking oil, and/or engine failure. Engine failure would result in a loss of motive power, which would increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the engine short block.

Listed for the model year, not checked against your VIN. Honda confirms which apply.
