1 recall listed by Transport Canada for this model year

Brakes 2020092 9 Mar 2020

Issue: On certain vehicles, the rod that connects the brake pedal to the brake booster may not be attached correctly. If the rod detaches, there would be an increase in brake pedal travel/force required to stop the vehicle. This can result in reduced brake performance. Safety Risk: Reduced brake performance can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Volkswagen will notify owners by mail and instruct you to take your vehicle to a dealer inspect the brake booster input rod and electronic brake booster. Depending on the results of the inspection, the dealer may replace the input rod mounting and electronic brake booster, as required.

Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.
