1 recall listed by Transport Canada for this model year

**Brakes** 2020092 9 Mar 2020

Issue: On certain vehicles, the rod that connects the brake pedal to the brake booster may not be attached correctly. If the rod detaches, there would be an increase in brake pedal travel/force required to stop the vehicle. This can result in reduced brake performance. Safety Risk: Reduced brake performance can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Volkswagen will notify owners by mail and instruct you to take your vehicle to a dealer inspect the brake booster input rod and electronic brake booster. Depending on the results of the inspection, the dealer may replace the input rod mounting and electronic brake booster, as required.

Listed for the model year, not checked against your VIN. Volkswagen confirms which apply.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
