2 recalls listed by Transport Canada for this model year

Powertrain

2021613 5 Oct 2021

Issue: On certain hybrid vehicles, a software error with the hybrid powertrain control module (HPCM) may cause the powertrain to shut down. If this happens, both the engine and electric motor can turn off, and cause a loss of power to the wheels. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Nissan will notify owners by mail and instruct you to take your vehicle to a dealer to reprogram the HPCM.

Seats and restraints

2016179 25 Apr 2016

On certain vehicles, a defect in the occupant classification system could allow an adult sitting in the front passenger seat to be classified as a child or an “empty seat”. This would suppress the airbag, which could increase the risk of injury in a crash. Correction: For affected Altima, Maxima, Murano, Rogue and Sentra vehicles, dealers will reprogram the airbag control unit and the occupant classification system control unit. For affected Leaf, NV200, Pathfinder, Q50 and JX35/QX60 vehicles, dealers will replace the occupant classification system electronic control unit.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
