2 recalls listed by Transport Canada for this model year

Airbag

2016638 16 Dec 2016

Certain vehicles may have been equipped with airbag inflators that do not meet specifications. This could cause affected airbags to fail to deploy in the event of a crash, which could increase the risk of injury to the occupants. Correction: Dealers will replace affected airbag modules. Note: Depending on the vehicle in question, the front passenger, and/or front seat-side airbag modules may be affected.

Seats and restraints

2016534 28 Oct 2016

On certain vehicles, the front passenger seatbelt buckle stud may not have been punched correctly during manufacturing. This may cause a separation between the buckle and the seat belt bracket, which could result in the belt not adequately restraining the seat occupant in a crash, increasing the risk of injury and/or damage to property. Correction: Dealers will inspect the front passenger seat belt buckle stud, and replace the seatbelt buckle as necessary.
