3 recalls listed by Transport Canada for this model year

Label

2024548 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Fuel system

2018570 19 Oct 2018

On certain 4x2 flex fuel (E85) vehicles equipped with a 2.4 L engine, a problem with the fuel pump could cause a loss of fuel pressure under certain operating conditions. This may lead to an engine stall, resulting in a sudden loss of motive power, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the fuel pump with an updated part.

Visual system

2017382 3 Aug 2017

Certain vehicles may not comply with Canada Motor Vehicle Safety Standard (CMVSS) 101 – Location and Identification of Controls and Displays. These vehicles may have been built with an Instrument Panel Control (“IPC”) software error that may illuminate multiple malfunction indicator lights (“tell-tales”) when no malfunction or indicated vehicle condition is present. This issue may occur when the fuel indicator is reading “Low Range” fuel. Driving with a false tell-tale may mask a truly active tell-tale and result in the driver not being aware of actual malfunctions which could affect vehicle performance and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update the IPC software.
