3 recalls listed by Transport Canada for this model year

Label

2022708 13 Dec 2022

Issue: On certain vehicles, the airbag warning labels are located on the headliner under the sun visors. Canadian regulations require information about the airbag system to be provided on both sides of the sun visor. Safety Risk: This small error does not affect safety. Corrective Actions: This is not a recall. Maserati has made changes to ensure that all new vehicles have the airbag warning labels installed correctly.

Tires

2021460 5 Jul 2021

Issue: On certain vehicles, the tire inflation pressure label lists the wrong cold tire pressure for the tires. The pressures are below what is recommended for the load limit listed. Canadian regulations require the recommended inflation pressures to be listed on the label. Safety Risk: This small error does not affect vehicle safety. The vehicles are equipped with a Tire Pressure Monitoring System (TPMS) which will turn on the warning light if the tire pressure drops below the minimum safe inflation pressure. Corrective Actions: This is not a recall. Maserati has made changes to ensure that all new vehicles have the correct tire inflation pressure on the label.

Structure

2018294 6 Jun 2018

Certain vehicles may have incomplete welds on the front subframe due to a manufacturing error. This could cause the welds on the subframe to break, which could affect vehicle handling and increase the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect the subframe for incomplete welds and replace it as necessary.
