8 recalls listed by Transport Canada for this model year

Accessories

202643310 Sep 2026

Issue : On certain vehicles, the pivot bolt(s) securing the roof crossbars may not have been tightened properly. As a result, the crossbar(s) could detach from the vehicle. Note: This recall also affects certain 2023-2026 Wagoneer L models and Grand Wagoneer L models. Safety Risk: A crossbar that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and secure the roof crossbar(s), as necessary.

Structure

202550625 Sep 2025

Issue: On certain vehicles, the left and right rear quarter glass trims may not have been secured properly. As a result, the trim(s) could loosen and separate from the vehicle. Safety Risk: Trim that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing. The corrective actions for this recall are under development.

Structure

202546711 Sep 2025

Issue: On certain vehicles, the window trims on the front doors may not have been secured properly. As a result, the trim(s) could loosen and separate from the vehicle. Safety Risk: Trim that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the window trim(s).

Powertrain

2025450 4 Sep 2025

Issue: On a small number of vehicles, the parking pawl return spring in the electric drive module may not have been installed correctly. As a result, when the transmission is shifted to Park, the vehicle could move if the parking brake isn't applied. Safety Risk: A parked vehicle that rolls away could create the risk of an injury or a crash. Corrective Actions: To reduce the safety risk, FCA Canada recommends that you should always use the parking brake when you park. FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to replace the electric drive module.

Visual system

2024766 19 Dec 2024

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Note: For the Grand Cherokee model, this recall affects both Grand Cherokee and Grand Cherokee L models. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to update the rearview camera module software.

Airbag

2024170 14 Mar 2024

Issue: On certain vehicles, the steering column control module may not have been manufactured properly. As a result, the driver-front airbag may not inflate in a crash. Note: This problem would cause the airbag warning light to turn on. Safety Risk: An airbag that is turned off could increase the risk of injury in a crash. Corrective Actions: FCA Canada will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the steering column control module.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
