§2 OBLIGATIONS [2]

cardog.app/tools/recalls/jeep/gladiator/2025

1 recall listed by Transport Canada for this model year

Steering

2026271 4 Jun 2026

Issue: On certain vehicles, the connection for the electric hydraulic power steering pump (EHPSP) could become loose. If this happens, the EHPSP connection could overheat and melt. Safety Risk: Wiring that overheats and melts can create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: To reduce the safety risk, FCA recommends that you should park your vehicle outside and away from other vehicles or buildings until the recall repairs are completed. FCA Canada will notify owners in writing and advise you to take your vehicle to a dealership to inspect and, if necessary, repair or replace the affected part(s).

Listed for the model year, not checked against your VIN. Jeep confirms which apply.

Check your VIN with Mopar Canada or call a Jeep dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
