**3** recalls listed by Transport Canada for this model year

### Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

### Brakes

2024456 12 Aug 2024

Issue: On certain vehicles, a problem with the integrated brake system could cause reduced power brake assist. As a result, there may be reduced braking and the antilock braking system (ABS) and dynamic stability control (DSC) may not work. Note: This recall replaces Transport Canada recall no. 2024-087. Safety Risk: Reduced braking can cause extended stopping distances and could increase the risk of a crash. Additionally, antilock brake and stability control systems that don't work could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to replace the integrated brake system.
