Body	Sedan	Plant	Tochigi Plant, Kawachi-Gun, Tochigi, Japan

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/infiniti/q50/2017

4 recalls listed by Transport Canada for this model year

Powertrain

2024362 21 Jun 2024

Issue: On certain vehicles, the driveshaft may not have been manufactured properly. As a result, the driveshaft could break and cause a loss of power to the wheels. Additionally, if the vehicle is parked and the parking brake isn't applied, the vehicle could roll away. Note: This recall only affects two-wheel-drive (2WD) models. Safety Risk: A loss of power to the wheels could increase the risk of a crash. A parked vehicle that rolls away could also create the risk of an injury or a crash. Corrective Actions: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to replace the driveshaft.

Airbag

2017447 15 Sep 2017

Certain vehicles may have been equipped with an out of specification frontal driver airbag inflator. As a result, the airbag may not deploy property in the event of crash, increasing the risk of injury or the driver. Correction: Dealers will replace the driver frontal airbag inflator.

Fuel system

2017375 27 Jul 2017

On certain vehicles, and incorrect fuel pressure map was used in the Fuel Pump Control Module (FPCM) software as a result, the pressure regulator may fail to open to send fuel from the sub tank to the main tank. Under certain conditions, the fuel level in the main tank could be too low for the fuel pump to send fuel to the engine resulting in a loss of motive power, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will update the software for the Fuel Pump Control Module.

Seats and restraints

2016179 25 Apr 2016

On certain vehicles, a defect in the occupant classification system could allow an adult sitting in the front passenger seat to be classified as a child or an “empty seat”. This would suppress the airbag, which could increase the risk of injury in a crash. Correction: For affected Altima, Maxima, Murano, Rogue and Sentra vehicles, dealers will reprogram the airbag control unit and the occupant classification system control unit. For affected Leaf, NV200, Pathfinder, Q50 and JX35/QX60 vehicles, dealers will replace the occupant classification system electronic control unit.

Listed for the model year, not checked against your VIN. Infiniti confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 11 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
