## 5 recalls listed by Transport Canada for this model year

### Lights and instruments

2025703 18 Dec 2025

Issue: On certain vehicles, the recall repairs completed by a Ford dealer during recall 23C35 (Transport Canada recall no. 2023-587) may not have been done correctly. As a result, a second repair is required. On certain vehicles, a software problem could cause the low brake fluid warning lamp not to turn on if the brake fluid level gets too low. A low brake fluid level can cause reduced braking. Safety Risk: A driver that isn't aware of a low brake fluid level could experience reduced braking and an increased risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software (BCM).

### Fuel system

2025366 8 Jul 2025

Issue: On certain vehicles, the low-pressure fuel pump could fail. If this happens, the engine may run rough or may not start and the check engine light may turn on. This could also result in a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the powertrain control module software. For Super Duty models, the dealer will replace the fuel pump.

### Lights and instruments

2023587 31 Oct 2023

Issue: On certain vehicles, a software problem could cause the low brake fluid warning lamp not to turn on if the brake fluid level gets too low. A low brake fluid level can cause reduced braking. Safety Risk: A driver that isn't aware of a low brake fluid level could experience reduced braking and an increased risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software (BCM).

## Airbag

2022075 17 Feb 2022

Issue: On a small number of vehicles, there may be a weld problem with the front passenger knee airbag. As a result, the knee airbag may not inflate properly in a crash. Safety Risk: An airbag that does not inflate properly could increase the risk of injury in a crash. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a dealer to replace the front passenger knee airbag.

## Airbag

2021769 17 Dec 2021

Issue: On a small number of vehicles, there may be a problem with the side curtain airbag inflators. As a result, the side curtain airbags may not inflate properly in a crash. Safety Risk: A side curtain airbag that does not inflate properly could increase the risk of injury in a crash. Corrective Actions: Ford will notify owners by mail and instruct you to take your vehicle to a dealer to replace the side curtain airbags.

Listed for the model year, not checked against your VIN. Ford confirms which apply.

Check your VIN with Ford Canada or call a Ford dealer with your VIN.

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
