cardog.app/tools/recalls/hyundai/ioniq/2020

1 recall listed by Transport Canada for this model year

High voltage

2021109 1 Mar 2021

Issue: On certain electric vehicles, there could be a problem inside the high-voltage battery. As a result, the high-voltage battery could short circuit while the vehicle is parked, charging, or driving. Note: Vehicles that had a battery replacement after completion of Hyundai recall R0175 (Transport Canada Recall No. 2020-477) do not require repair under this recall. For the Hyundai Ioniq, only certain all-electric models are affected by this recall. Safety Risk: A short circuit in the battery could cause a fire. Corrective Actions: Hyundai will notify owners by mail and instruct you bring your vehicle to a dealer to lower the battery charging limit to 80% until the final repair is available. You will also be provided with instructions for how to do this yourself using the vehicle's infotainment system. Hyundai recommends that you should park your vehicle outdoors, and away from other vehicles or buildings until the battery charging limit is changed. The second step of this recall will be to replace the high-voltage battery (BSA). Hyundai will notify you when a replacement battery is available for your vehicle. Click here for more information.

Listed for the model year, not checked against your VIN. Hyundai confirms which apply.
Check your VIN with Hyundai Canada or call a Hyundai dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
