Trim	GL	Maker	HYUNDAI MOTOR CO
Body	Coupe	Plant	Ulsan, South Korea

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/hyundai/genesis-coupe/2016

3 recalls listed by Transport Canada for this model year

Brakes

2023125 8 Mar 2023

Issue: Hyundai is conducting a special service campaign that provides anti-corrosion treatment to certain underbody components. Over time, components under the vehicle, including brake lines could corrode. If this happens, a brake line could fail and leak. A brake fluid leak can result in reduced braking. Safety Risk: Reduced braking can cause an extended stopping distance and increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to inspect the underbody, including the brake lines. The dealer will apply an anti-corrosion treatment to certain parts, and replace the brake lines if necessary.

Airbag

2020192 1 May 2020

Issue: On certain cars, the bolts that attach the driver-front airbag may not be tightened correctly. As a result, the airbag could become loose. If you continue to operate the vehicle with a loose airbag, it may detach from the steering wheel. Safety Risk: An airbag that is loose or detaches from the steering wheel could create an increased risk of injury in a crash. Corrective Actions: Hyundai will notify owners by mail and instruct you to take your car to a dealer to inspect the driver-front airbag mounting bolts and tighten them, if necessary.

Airbag

2016508 17 Oct 2016

On certain vehicles, objects or debris located under the front passenger seat could contact the electrical connector of the Occupant Classification System (OCS) and disconnect the connector if the seat is moved. This would disable the OCS and illuminate the instrument cluster Air Bag warning lamp. If the OCS is disabled, the first stage front passenger airbag would deploy in a frontal collision, regardless of the weight and size of the front passenger seat occupant. If the seat were to be occupied by a child seat or small statured occupant, it could increase the risk of injury. Additionally, this condition could cause the second stage of the frontal passenger airbag to fail to deploy during a crash, which could increase the risk of injury to the front passenger seat occupant. Correction: Dealers will secure the OCS connector to prevent it from being disconnected.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same model year, 4 live listings, as of 29 Oct 2026
[5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
