2 recalls listed by Transport Canada for this model year

Structure

2025483 12 Sep 2025

Issue: On certain vehicles, the exterior B-pillar trims on the driver and front passenger doors may not be properly attached. As a result, the trim(s) could loosen and separate from the vehicle. Safety Risk: Trim that detaches from the vehicle could create a road hazard for others and increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect and repair or replace the exterior B-pillar trims, as necessary.

Suspension

2020051 11 Feb 2020

Issue: On certain vehicles, the rear suspension toe link(s) could break. This could cause a sudden loss of vehicle stability. Note: Vehicles previously repaired under Ford Campaign 19R01 or 19S18 do not require repair under this recall. For the Taurus model, only the SHO Performance Package model is included in this recall. Safety Risk: A loss of vehicle stability could cause a loss of control and increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a Ford or Lincoln dealer to install improved rear suspension toe links.
