cardog.app/tools/recalls/ford/mustang/2022

6 recalls listed by Transport Canada for this model year

Lights and instruments

2025703 18 Dec 2025

Issue: On certain vehicles, the recall repairs completed by a Ford dealer during recall 23C35 (Transport Canada recall no. 2023-587) may not have been done correctly. As a result, a second repair is required. On certain vehicles, a software problem could cause the low brake fluid warning lamp not to turn on if the brake fluid level gets too low. A low brake fluid level can cause reduced braking. Safety Risk: A driver that isn't aware of a low brake fluid level could experience reduced braking and an increased risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software (BCM).

Fuel system

2025366 8 Jul 2025

Issue: On certain vehicles, the low-pressure fuel pump could fail. If this happens, the engine may run rough or may not start and the check engine light may turn on. This could also result in a sudden loss of engine power while driving. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the powertrain control module software. For Super Duty models, the dealer will replace the fuel pump.

Visual system

2025360 27 Jun 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to display when the transmission is shifted into reverse. Canadian regulations require the rearview image to display when the vehicle is reversing. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the SYNC software.

Steering

2025085 14 Feb 2025

Issue: On certain vehicles, the recall repairs completed by a Ford dealer during recall 24S44 (Transport Canada recall no. 2024-381) may not have been done correctly. As a result, a second repair is required. On certain vehicles, a sensor in the steering gear may not have been calibrated properly. As a result, the steering wheel could suddenly turn from side to side by itself while turning. If this happens, there could be a loss of steering control. Safety Risk: A loss of steering control could create the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the power steering control module (PSCM) software.

Steering

2024381 1 Jul 2024

Issue: On certain vehicles, a sensor in the steering gear may not have been calibrated properly. As a result, the steering wheel could suddenly turn from side to side by itself while turning. If this happens, there could be a loss of steering control. Safety Risk: A loss of steering control could create the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the power steering control module (PSCM) software.

Lights and instruments

2023587 31 Oct 2023

Issue: On certain vehicles, a software problem could cause the low brake fluid warning lamp not to turn on if the brake fluid level gets too low. A low brake fluid level can cause reduced braking. Safety Risk: A driver that isn't aware of a low brake fluid level could experience reduced braking and an increased risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the body control module software (BCM).

Listed for the model year, not checked against your VIN. Ford confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote, live public dealer listings and the window sticker. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
