cardog.app/tools/recalls/ford/f-650/2021

3 recalls listed by Transport Canada for this model year

Fuel system 2024780 20 Dec 2024

Issue: On certain vehicles, the high-pressure fuel pump could fail. If this happens, the engine may run rough and the check engine light may turn on. This could also cause a sudden loss of engine power while driving. Note: This recall only affects certain vehicles equipped with a 6.7 L diesel engine. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to update the powertrain control module software.

Fuel system 2022009 17 Jan 2022

Issue: On certain trucks, there may be a defect in the cap for the secondary fuel filter located in the engine compartment. Over time, a pinhole could develop and cause fuel to leak from the top of the fuel filter. Note: This recall only affects trucks with a 6.7 L diesel engine. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Ford will notify owners by mail and instruct you to take your truck to a dealer to replace the primary and secondary fuel filters.

Structure 2020334 20 Jul 2020

Issue: On certain trucks, the underbody heat shields and other heat-protection components may be missing. As a result, the interior cabin floor and seat attachments could become hot during certain driving conditions. Note: This recall only affects trucks equipped with a 7.3 L gas engine. Safety Risk: If a person touches a hot floor or seat bolts, there could be a risk of a burn injury. Corrective Actions: Ford will notify owners by mail and instruct you to take your truck to a dealer to install the missing underbody heat shield, thermal insulator patch under the floor mat, seat base covers, and seat bolt covers.

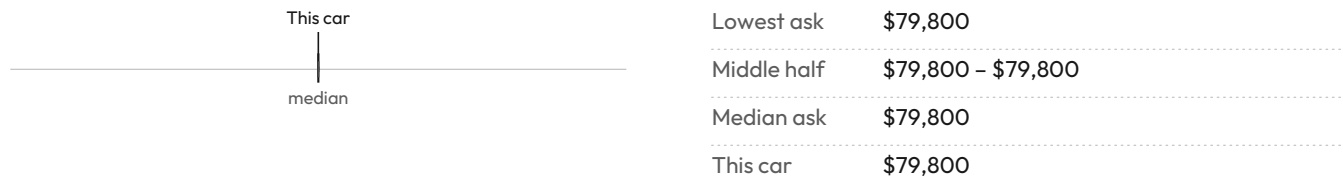

Listed for the model year, not checked against your VIN. Ford confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
