2 recalls listed by Transport Canada for this model year

Seats and restraints

2021532 26 Aug 2021

Issue: On certain vehicles, the passenger seat belt assemblies may contain defective automatic locking retractors (ALR). As a result, the seat belts may not properly lock to secure a child seat. Note: The vehicle's lower universal anchorage system (UAS) is not affected by this defect and may still be used to secure a child seat. Safety Risk: A seat belt that is used to secure a child restraint but is not properly locked could increase the risk of injury in a crash. Corrective Actions: Jaguar will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the seat belts. They will be replaced, if necessary.

Lights and instruments

2021101 26 Feb 2021

Issue: On certain vehicles, when the Automatic High Beam (AHB) system is turned on, the AHB tell-tale indicator on the instrument panel may not turn on. This could lead you to drive without knowing that high beam lights can turn on automatically. Canadian regulations require a tell-tale indicator to turn on when the automatic high beams are activated. Safety Risk: A driver that does not know that the high beam lights are turned on could create glare for other drivers and increase the risk of a crash. Corrective Actions: Jaguar will notify owners by mail and instruct you to take your vehicle to a dealer to update vehicle software.
