3 recalls listed by Transport Canada for this model year

High voltage

2026441 17 Sep 2026

Issue: On certain vehicles, the DC/DC converter could fail. As a result, the 12 V battery would not charge and a red "Stop Safely Electrical Fault Detected" warning message would be displayed. If this happens, and you continue to drive the vehicle, there could be a loss of power to the wheels and/or the vehicle's lights could turn off. Note: This recall is an expansion of Transport Canada recall no. 2026-195. Vehicles repaired under that recall don't require this repair. This recall only affects certain mild hybrid electric vehicles (MHEV). Safety Risk: A loss of power to the wheels could increase the risk of a crash. Exterior lights that don't work may make the vehicle less visible to others and increase the risk of a crash. Corrective Actions: Jaguar will notify owners by mail and advise you to take your vehicle to a dealership to update the vehicle load balancing software.

Engine

2024600 10 Oct 2024

Issue: This recall is for certain replacement engines. The oil filter housing may not have been manufactured properly. Over time, the housing could crack and cause oil to leak onto hot components in the engine compartment. Safety Risk: Oil that leaks onto hot components can create the risk of a fire. Additionally, an oil leak could create a hazard for others and increase the risk of a crash. Corrective Actions: None of the affected engines have been installed in vehicles. Jaguar will instruct dealers to replace the oil filter housing assembly before each engine is installed.
