2 recalls listed by Transport Canada for this model year

Airbag

2026292 12 Jun 2026

Issue: On certain vehicles, the connector for the driver-front airbag in the steering wheel could corrode. As a result, the driver-front airbag may not inflate in a crash. Note: This problem would cause the airbag warning light to turn on. Safety Risk: An airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to apply grease to the driver's airbag connector terminals.

Seats and restraints

2026227 12 May 2026

Issue: On a small number of vehicles, the audio amplifier may have been damaged during manufacturing. As a result, the seat belt reminder chime may not work when your seat belt isn't buckled. Canadian regulations require a seat belt reminder sound when a driver isn't wearing their seat belt. Safety Risk: A seat belt warning that doesn't work correctly may not remind you to buckle your seat belt. Not wearing your seat belt can increase the risk of injury in a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to replace the audio amplifier.
