2 recalls listed by Transport Canada for this model year

Brakes

2024122 23 Feb 2024

Issue: On certain vehicles, the parking brake handle could be released without pushing the release button. As a result, the vehicle could move unexpectedly. Note: This recall only affects certain Super Duty incomplete vehicles. Safety Risk: A parked vehicle that moves suddenly could create the risk of an injury or a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your vehicle to a dealership to inspect, and if necessary, replace the parking brake handle.

Powertrain

2023508 12 Sep 2023

Issue: On certain trucks, a defect inside the transmission could cause the park pawl not to engage when the transmission is shifted to the park (P) position. If this happens, the truck could move when it's parked, and the parking brake isn't used. Note: This recall only affects trucks equipped with a 6-speed automatic transmission. Safety Risk: A parked vehicle that rolls away could create the risk of an injury or a crash. Corrective Actions: Ford will notify owners by mail and advise you to take your truck to a dealership to inspect the transmission. If metal fragments are found, the transmission will be replaced. If no metal is found, the valve body and extension housing will be replaced.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
