3 recalls listed by Transport Canada for this model year

Structure — 2025315 — 12 Jun 2025

Issue: On certain vehicles, the rear doors may not latch properly when they are closed. As a result, the rear doors could open while driving. Safety Risk: A door that opens suddenly while driving could create the risk of injury and/or increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to disable the unilatch keyless vehicle (KV) entry function.

Lights and instruments — 2021102 — 25 Feb 2021

Issue: On certain vehicles, when the Automatic High Beam (AHB) system is turned on, the AHB tell-tale indicator on the instrument panel may not turn on. This could lead you to drive without knowing that high beam lights can turn on automatically. Canadian regulations require a tell-tale indicator to turn on when the automatic high beams are activated. Safety Risk: A driver that does not know that the high beam lights are turned on could create glare for other drivers and increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and instruct you to take your vehicle to a dealer to update vehicle software.

Lights and instruments — 2020096 — 11 Mar 2020

Issue: On certain vehicles, when towing a trailer, the trailer lights may not turn on. As a result, a following driver may not recognize that a vehicle ahead is towing a trailer or that it is braking. Safety Risk: Trailer lights that do not work could reduce the vehicle's visibility. This could increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and instruct you to take your vehicle to a dealer to update the Body Control Module software.
