Model year	2016	Engine	2.0 L, 4 cylinders
Make	Audi	Fuel	Gasoline
Model	TT	Drive	AWD
Trim	Quattro	Maker	AUDI AG
Body	Coupe	Plant	Gyor, Hungary

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/audi/tt/2016

4 recalls listed by Transport Canada for this model year

Airbag

2022403 27 Jul 2022

Issue: On certain vehicles, the passenger-front airbag inflator could rupture when the airbag deploys in a crash. If this happens, the airbag may not inflate properly and small pieces of metal could be propelled toward vehicle occupants. Safety Risk: An airbag inflator that ruptures can create a risk of injury or death. Corrective Actions: Volkswagen and Audi will notify owners by mail and instruct you to take your vehicle to a dealer to replace the passenger-front airbag module.

Fuel system

2020053 12 Feb 2020

Issue: On certain cars, the fuel tank could be damaged in a front crash. As a result, the fuel tank could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: The company will notify owners by mail and instruct you to take your car to a dealer to install a protective cap on the fuel tank heat shield bracket.

Airbag

2019002 3 Jan 2019

Issue: On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the driver-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function. Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury. Corrective Actions: Owners will be notified by mail and instructed to take their vehicle to a dealer to have the driver-front airbag inflator replaced. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Lights and instruments

2016427 2 Sep 2016

Certain vehicles may not comply with the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 108 - Lighting System and Retroreflective Devices. In a situation where the parking lights are switched on and the vehicle is locked, the side marker lights do not illuminate, which is contrary to the requirements of the standard. This could reduce vehicle visibility, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update vehicle software.

> Listed for the model year, not checked against your VIN. Audi confirms which apply.

Window sticker	We do not collect window stickers for this manufacturer.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 3 live listings, as of 27 Oct 2026

[5] Live public dealer listings on Cardog, as of 27 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
