2 recalls listed by Transport Canada for this model year

Brakes

2026187 15 Apr 2026

Issue: On certain vehicles, the brake booster input rod may not have been tightened properly. As a result, the input rod could detach from the brake booster and cause a loss of brakes. Note: This recall is an expansion of Transport Canada recall no. 2024-670. For 2020-2024 model years, this recall affects both Sportback and SUV models. Safety Risk: A loss of brakes can increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the brake booster input rod screw joint.

Visual system

2025713 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to update the rearview camera software.
