3 recalls listed by Transport Canada for this model year

Visual system

2025713 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to update the rearview camera software.

Fuel system

2022384 20 Jul 2022

Issue: On certain vehicles, the fuel delivery module inside the fuel tank could fail. If this happens, the engine may run rough or may not start. This could also result in a sudden loss of engine power while driving. Note: This problem could cause the emission control system warning light to turn on. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Audi will contact owners by mail and instruct you to bring your vehicle to a dealership to replace the fuel delivery module.

Powertrain

2020207 13 May 2020

Issue: On certain vehicles, a transmission fluid pipe was not properly welded. As a result, the pipe may leak transmission fluid. Safety Risk: A transmission fluid leak on the roadway could create a hazard for others by making the road slippery. Corrective Actions: Audi Canada will notify owners by mail and instruct you to take your vehicle to a dealer to inspect and replace the defective transmission fluid pipe, if necessary.
